Key points

Trainee Summer Camp

This programme for school graduates and career starters provides a guideline for choosing a career. The aim is to build on the existing knowledge and improve German language skills. The combination of theoretical basics and company visits enables the young people to get a first glimpse into German corporate culture and the job. After successfully completing the programme, the participants receive a bsw certificate.

We organise an individual 1 to 2 months long programme with topics such as:

- introduction into the selected subject
- hands-on experience
- company visits

This is a selection and may be added with other topics based on the group's individual wishes.

Subjects

industrial-technical (e. g. mechatronics, CNC operating, welding),
commercial or social & health professions

Target group

Students and graduates of High Schools, VET colleges or similar

Language

Basic German language skills are an advantage.

Fees

Fees depend on length and scope of the course. We can run the course on-site in Saxony or online. In order to keep the costs low, we recommend at least 10 participants per group. We will gladly provide a quote.
